Tiller	2-Cycle		X		X		
Vibratory Plate Compactor	4-Cycle	X		X			
Power Washer	4-Cycle	X		X			X
Generator	4-Cycle	X		X			

Use stabilized non-ethanol fuel when a piece of equipment receives little use and is stored over long periods of time.

Add fuel stabilizer to fuel for engines that receive regular use but are stored over the winter.

Fuel Stabilizer must be mixed as a specific ratio of fuel to stabilizer, excessive stabilizer can damage an engine, stabilizer is alcohol based.

Power washer and tank sprayer must be winterized to prevent pump cracking
